FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Revenue** assume their agency would not be administratively impacted by this proposed legislation.

Officials from the **Department of Agriculture** (AGR) assume the MDA Fuel Quality Program will require one additional chemist to handle the extra testing of all gasoline samples as well as instructing the service station operators, suppliers and terminals as to the requirements. One additional Fuel Device Safety Inspector will be required to assist in enforcement of the labeling and documentation requirements. The chemist will use an existing gas chromatograph and the inspector will require a pickup truck, camper shell, sample collection equipment and oxygenate analyzer. The existing three inspectors will also each use an oxygenate analyzer.

AGR noted that the chemist will be responsible for performing the oxygenate tests and contacting all sellers not complying with the requirements. This new requirement will require one additional Fuel Device Safety Inspector to offset the lost inspection time of the present three inspectors performing fuel quality inspections and sampling. The inspectors will carry portable oxygenate analyzers and will be used as needed for enforcement purposes. Considerable increase in follow up inspections is expected. The Fuel Quality Program is currently inspecting 55% of the service stations annually.

AGR noted that Chapter 414.012 through 414.152 is funded solely from the Petroleum Inspection Fee Fund. AGR also noted that the Director of Revenue (DOR) must increase the fee rate to cover the cost of the program. Therefore, **Oversight** assumes, pursuant to 414.082, DOR will increase fees to recoup the costs incurred by the Petroleum Inspection Fund. In the fiscal impact, Oversight has indicated an increase in fees to recoup costs incurred for each previous calendar year. Lag time in recoupment and timing differences between fiscal and calendar years create a negative fiscal impact in some years.

Oversight has adjusted AGR's Personal Services to reflect a more reasonable starting salary for the positions requested. Additionally, Oversight adjusted Expense and Equipment to a more reasonable figure.

FISCAL IMPACT - Small Business

Small businesses who sell motor fuel containing oxygenate would be expected to experience an increase in administrative costs due to the provisions in this proposal.

DESCRIPTION

This bill requires sellers of motor fuel containing an oxygenate to notify buyers of the amount and type of oxygenate used.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
